Open Access Policy

- IJOR is a fully open access journal which means all articles are published online, for everyone to read, download and share for free. All readers can view their published articles freely, which maximizes the opportunity for the articles to be read and for authors to be recognized for their contribution in Operations Research and their applications.

- We don't charge for IJOR article processing charges (APC). For those authors who request a hardcopy for presentation and preservation, promotion or dissemination of their work, an open access publication fee is payable by authors or their research funder. These include the publishing and review process coordination, typesetting, author and editor support according to the IJOR subscription policy.

- The corresponding author and all co-authors, agree that the article, if editorially accepted for publication, shall be licensed under the Creative Commons Attribution License 4.0 (CC BY 4.0).
